

Single-rollout runtime vs error

Lower and left is better

—○— Classical ● Neural — small ■ Neural — full M6 time

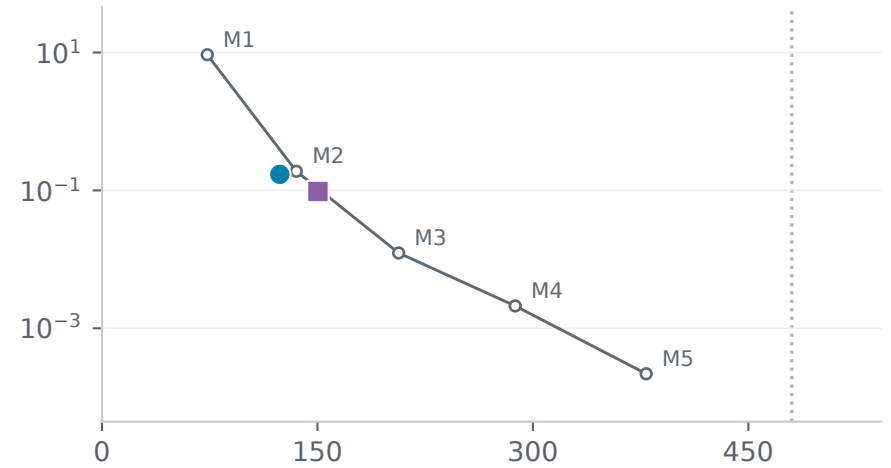

Stokes

T = 20

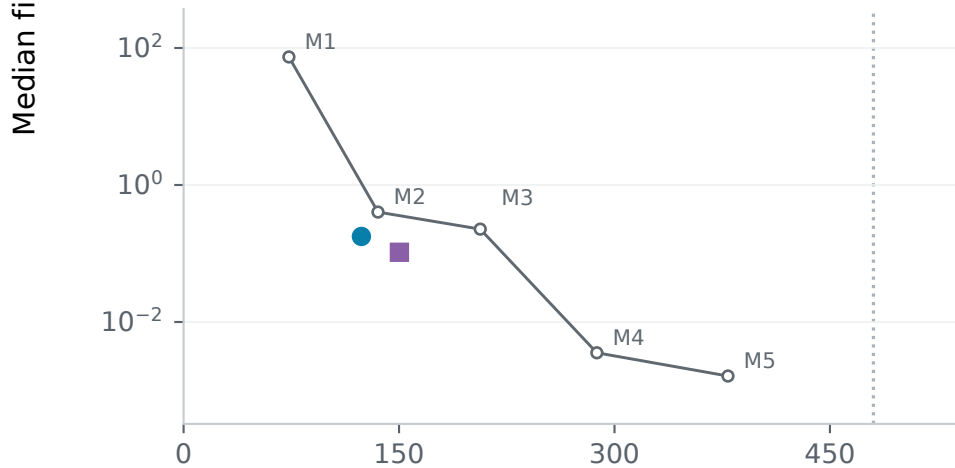

Tanaka

T = 200

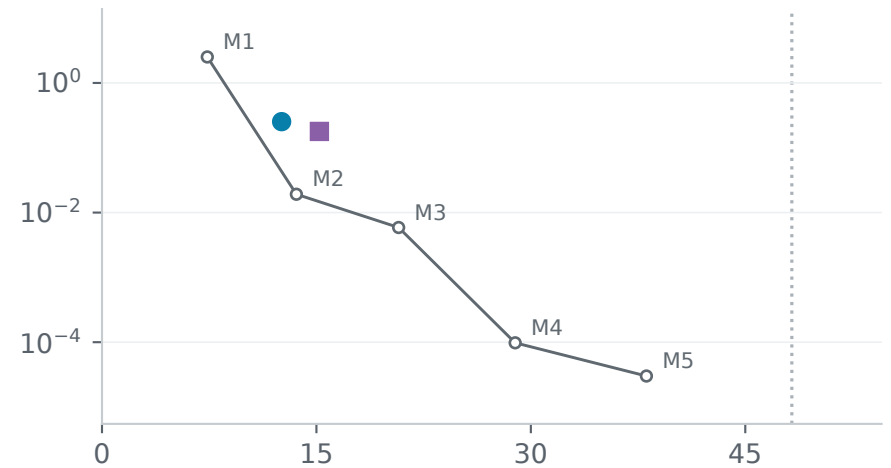

Benjamin-Feir

T = 200

JONSWAP / TMA

T = 20

One rollout (seconds)

Errors: 32 test cases per family. Times: one case.
All times exclude compilation, warm-up and transfers.

M6 is the reference; dotted lines show its runtime.
