

Batch runtime vs error

Lower and left is better

—○— Classical ● Neural — small ■ Neural — full M6 time

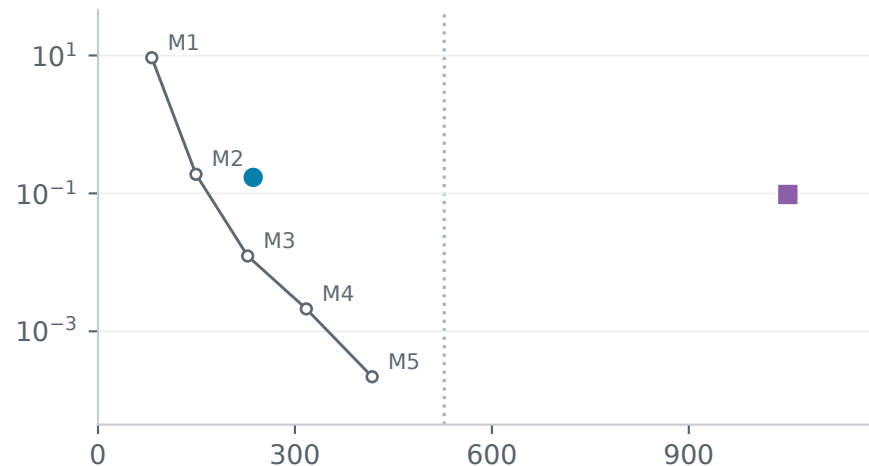

Stokes

T = 20

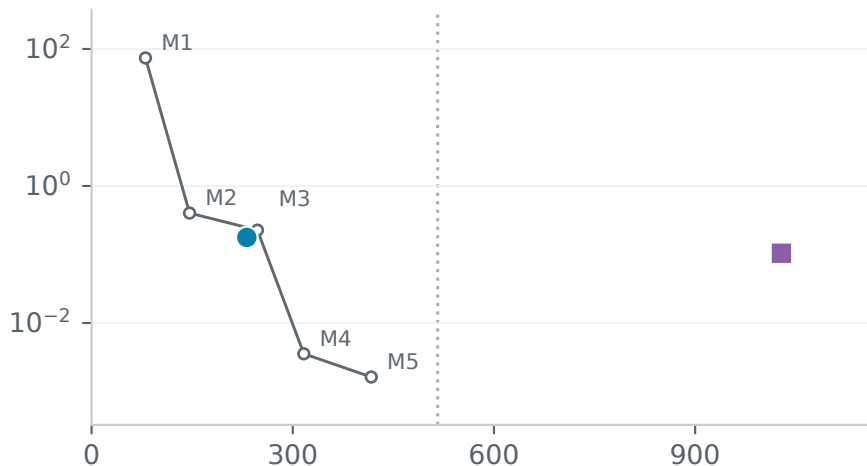

Tanaka

T = 200

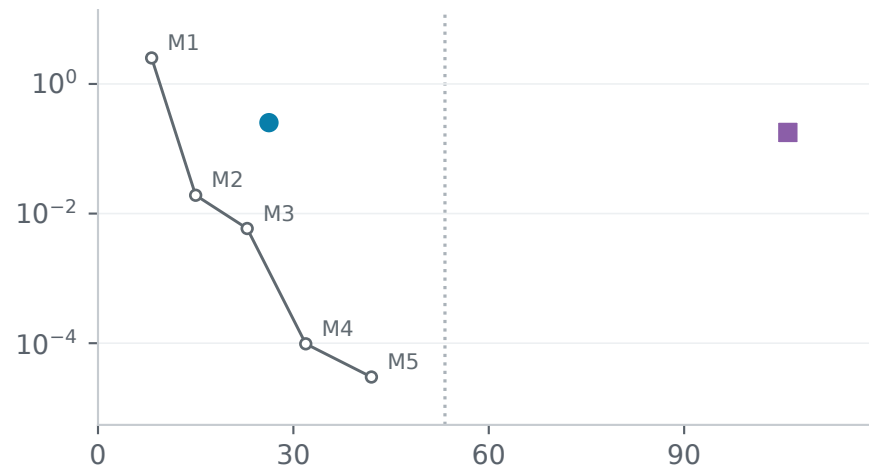

Benjamin-Feir

T = 200

JONSWAP / TMA

T = 20

32 rollouts together (seconds)

Times and errors: 32 test cases per family.

M6 is the reference; dotted lines show its runtime.

Neural times include compilation and transfers. Classical times do not.
